Remember, you have represented that your objectives are to seek short-term trading profits by actively trading using highly speculative methods.

GUIDE TO YOUR STATEMENT

Your statement may contain the following sections:

Your Portfolio at a Glance: Reflects the net equity of your account at the close of the statement period, the net equity of your last statement and any change since the last statement. Figures shown for Long and Short Market Value of Securities contain netted values. A more comprehensive breakout of market values is reflected within the body of the statement.

Transaction Summary and Cash Balance Summary: Both show your opening and closing balances. Transaction Summary reflects the categories of cash activity. Cash and Cash Equivalent Balance Summary reflects the cash balances by account type. Opening Balance is the credit or debit carried over from the previous period's closing balance. Closing balance is the combination of the total debits and credits for the statement period together with the opening cash balance. A debit balance (money you owe us) is indicated by a minus sign in these sections.

Retirement Account Summary: Reflects the contributions received and distributions paid during this statement period as well as for the previous year.

Your Portfolio Holdings: Reflects cash and all securities in your account. Accrued interest represents interest earned but not yet paid or collected on the fixed income securities since the last coupon date. There is no guarantee that this interest will be paid by the issuer. Current yield is calculated by dividing the estimated annual income by the market value of the securities and represents an estimated current yield only.

Market Prices/Bond Ratings

The market value of your holdings are as of the last business day of the statement period. Prices for determining market values represent estimates. These estimates are obtained from multiple sources, including outside services. Pricing estimates may be based on bids, prices within the bid/offer spread, closing prices or matrix methodology that uses data relating to other securities whose prices are more ascertainable to produce a hypothetical price based on the estimated yield spread relationship between the securities. Pricing estimates do not constitute bids for any securities. Actual prices realized at sale may be more or less than those shown on your statement. Bond ratings are received from outside sources. While we believe our sources for market values and bond ratings to be reliable, we cannot guarantee their accuracy.

Trades Executed But Not Yet Settled: This section will reflect any trades not yet settled by the statement closing date. The settlement date is indicated in the first column.

IMPORTANT NOTES

Dividend Income: Dividends credited to your account may include capital gains, non-taxable dividends and/or dividends on foreign stock. You may wish to consult your tax advisor with regard to your tax liability on these dividend credits.

Methods of Computing Interest on Debit Balances:

Interest is charged on a day-by-day basis for any day that there is a net debit balance in your overall account. The calculation is made on a 365-day basis at the rate or rates shown on the statement. Interest rates may be changed from time to time with fluctuating money market rates or for other reasons.
